

Australis Hake

FIORDOSUR

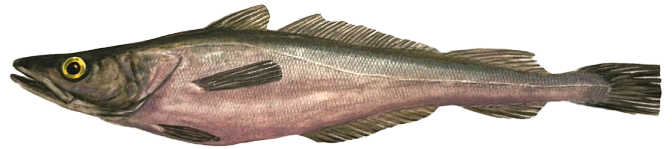

Nutrisko recognizes the challenge and responsibility companies face in transforming industries and advancing economic development. As a committed player in this field, we are dedicated to fostering wellbeing in our communities and surrounding environments.

Scientific name
Merluccius australis

Fishing method
Long Liner

Description

Chilean Australis Hake, or *Merluccius australis*, is a wild-caught fishery sourced from the pristine and unspoiled waters of Chilean Patagonia. This remote and virgin region provides an ideal environment for the hake, which features a slender body, a short head, and a protruding lower jaw with visible teeth.

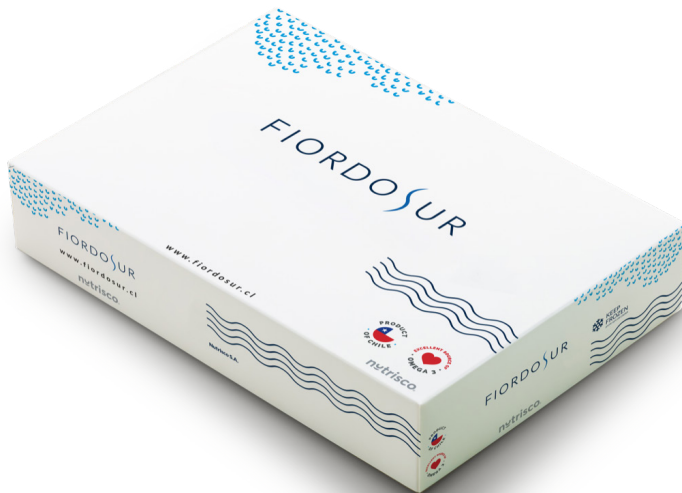

Fishing season **FAO 87**
