

King Crab

FIORDOSUR

We promote a sustainable strategy aimed at making our species a key driver of future generation's nutrition.

Scientific name
Lithodes santolla

Fishing method
Bait & Trap

Description

Explore the stunning landscapes of southern Chile, where our King crab thrives in the icy waters, benefiting from a pristine environment. Found in emerald bays and deep fjords, these crabs are influenced by the region's natural beauty, which enhances their unique flavor. Our sustainable fishing practices ensure responsible capture, with all female specimens returned to the fjords to protect the species and maintain the health of the Chilean coastline.

Fishing season

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC
