

Stone Crab

We are deeply committed to enhancing the positive impact of our oceans, ensuring that its benefits reach beyond the coasts and resonate across the entire planet and its inhabitants.

Scientific name
Cancer edwardsii

Fishing method
Bait

Description

Stone Crab is a remarkable seafood choice, known for its distinctive claw-like appearance. Found in the warm waters of the Los Lagos Region, these crabs thrive among coral reefs and sandy ocean beds. They can grow up to 7 inches in claw length, offering tender, sweet meat with a buttery richness. Best enjoyed with a touch of lemon and tangy mustard sauce, Stone Crab is an exceptional delicacy that elevates any dining experience.
