

Swordfish

Nutrisco is deeply committed to enhancing the positive impact of our oceans, ensuring that its benefits reach beyond the coasts and resonate across the entire planet and its inhabitants.

FIORDOSUR

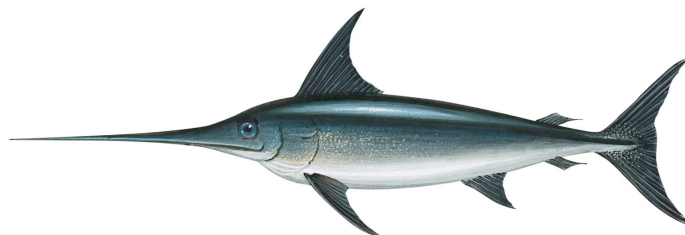

Scientific name
Xiphias gladius

Fishing method
Longlining

Description

Swordfish from Nutrisco is sustainably sourced in the expansive waters off the coast of Chile, the swordfish swims with grace as a highly migratory pelagic fish. Found between Regions I and X, it navigates both within and beyond the exclusive economic zone, showcasing its cosmopolitan nature.

This remarkable creature is not just a sight to behold but also a prized catch. With its firm, flavorful flesh, Chilean swordfish is a culinary delight that brings people together. Whether grilled or seared, its rich taste highlights the unique flavors of the ocean, making it a favorite at seaside gatherings and dinner tables alike.
